

Cover Letter

Dear Recruiter,

With over three- years of experience in developing responsive and user-friendly websites using HTML, CSS, JavaScript, and React.js, I bring a rich blend of technical expertise and team leadership. My journey in web development includes building and maintaining 18+ websites, mentoring junior developers, and ensuring high-performance user interfaces.

Recently, I have been expanding my skill set by actively learning backend technologies including Node.js, Express.js, and MongoDB, working towards becoming a proficient MERN Stack Developer. I believe in writing clean, maintainable code and continuously seek to deliver value through scalable and efficient web solutions.

I am passionate about frontend development, but also enthusiastic to contribute as a full-stack junior developer, leveraging my practical exposure and continuous learning. I would be honored to contribute to your development team and grow together.

Thank you for considering my application.

Sincerely,
Bhaskar Banerjee
